**Subject:** **Thompson Wildfire Update June 10, 2025**

---

The Northern Health Region's Incident Command has received direction from the Provincial Incident Command to begin relocating patients from the Thompson General Hospital and residents from Northern Spirit Manor in the community of Thompson. This is a precautionary measure, the community is not under evacuation, this is due to smoke and the feasibility of using the Thompson airport could become compromised by smoke.

All staff please continue to report to work as scheduled and note these relocations will occur in a structured sequence.
